

How to select the correct strength for your vision.

IN 4 EASY STEPS...

1. Print this chart on standard A4 paper
2. Sit the chart so that it is approximately 34cm/14 inches from your eyes
3. To find the strength you need, read the chart **WITHOUT GLASSES**
4. Find the line with the print you can read clearly and use that strength

If this line is difficult to read then use..... **+ 3.50**

If this line is difficult to read then use..... **+ 3.00**

If this line is difficult to read then use..... **+ 2.50**

If this line is difficult to read then use..... **+ 2.00**

If this line is difficult to read then use..... **+ 1.50**

If this line is difficult to read then use..... **+ 1.00**

While we at Snazzy Specs are confident in the accuracy of our eye chart, it is not intended, nor should it, replace an eye test carried out by a qualified optician.
